Portfolio

👤 Personal Summary

Possess a positive mental attitude, organised and self-motivated, and always willing to learn new skills. A very good and reliable team player and can easily adapt to any situation. Have a good and practical knowledge of HTML5, CSS3, JavaScript, React, Redux, Typescript, Bootstrap 5, PHP, PhpMyAdmin, C#, OutSystems Reactive, Docker, PostgreSQL, MySQL, Node.js, Design sprints and Agile Software Development.

🔷 Education & Qualifications

- Full stack Software Development at Boolean UK – 2022

- IGCSE English - 2019

- MSc Renewable Energy and Resource Management at University of South Wales – 2015

- BEng Mechanical Engineering at University of agriculture Makurdi, Nigeria – 2013

- Aveco Model College Nigeria (GCSE)

🎒 Programming Skills

Front end – HTML5, CSS3, React, Typescript (Ts), JavaScript (Js), C#, PHP

Back end – JavaScript (Js), Typescript (Ts), Node

Database – PostgreSQL, MySQL, Prisma Schema (ORM)

DevOps – OutSystems Reactive

Others – Bootstrap5, Docker, Git, GitHub

🧗 Project Experience

Perfect Match Dating Site

- Using React for the front end, Node with typescript for the back end, PostgreSQL and Prisma schema for my database. I was able to create a dating site that uses JWT to secure the registration and signing to the web application.
- I was able to successfully display the list of users which can be tailored to meet sexual orientation and genders.
- For more details, please visit my [GitHub repo](#)

Community Project - Christ Church Birmingham

- Used a template provide by the [Hubb](#) to finish the building of a church website that can be viewed across all platforms with responsiveness.
- To view the finished work, please click the link [CCB](#)

Wordle Duplicate

- Using react to build an online word game which is like that of the real wordle.
- For more details, visit the finished work here [Wordle Duplicate](#)
